

Quest Software Product Guide

Now more than ever, organizations need to work smart and improve efficiency. Quest Software creates and supports smart systems management products—helping our customers solve everyday IT challenges easier and faster.

At Quest, we focus on our customers first. Our products and people are dedicated to helping customers manage their critical applications, databases, Windows infrastructure and virtual environments. The combination of our proven, award-winning software and strong customer relationships makes Quest a smart, reliable technology partner.

APPLICATION MANAGEMENT

Foglight®

Foglight® reduces or eliminates service disruptions to unify IT and the business. Unlike other solutions, it provides a correlated, 360-degree view of your applications—from end user to database, and from service levels to infrastructure. Foglight sources the root cause of all incidents impacting your business and resolves them quickly.

JClass®

JClass® provides industry-standard Java components for JEE and JSE, including charts, data visualization components and reporting, to boost developer productivity and ensure optimal code quality.

JProbe®

JProbe® is a powerful performance tuning solution for Java that helps quickly discover, diagnose and resolve performance issues in JEE and JSE applications down to line-level root cause.

PerformaSure®

PerformaSure® diagnoses pre-production performance issues in multi-tiered JEE applications, combining end-user transactional data with infrastructure metrics to measure, analyze and maximize application performance.

Stat®

Stat® enables you to reduce costs and increase staff productivity through improved control, visibility and automation of change management processes. It also helps you achieve regulatory compliance by controlling and tracking changes—from the time the change is requested through its automated deployment to production.

DATABASE MANAGEMENT

Performance Management

Foglight® Performance Analysis

Foglight® Performance Analysis offers an extensive workload analysis solution for diagnosing and tuning database instances and factors affecting application behavior. It transforms performance management into a faster, easier and more efficient experience. Performance Analysis is available for Oracle and SQL Server.

Quest Performance Tuning Suite for Sybase ASE (Adaptive Server Enterprise)

Quest Performance Tuning Suite for Sybase ASE allows DBAs to diagnose, optimize and manage database performance via visual, real-time diagnostics, automated SQL optimization and analysis of SQL performance changes.

Quest SQL Optimizer for Oracle

Quest SQL Optimizer for Oracle validates database code to ensure the best possible performance. It scans and analyzes SQL, then identifies potential performance issues directly from running SQL statements, PL/SQL or other source code. SQL Optimizer explores every possible way of improving SQL performance, and either proves that top-performing SQL is already in place or provides you with the best alternative.

DATABASE MANAGEMENT, Performance Management, (continued)

Quest SQL Optimizer for Sybase

Quest SQL Optimizer for Sybase offers SQL diagnosis, optimization and management for improved performance. Impact investigations of indexing strategies and SQL statement updates ensure an understanding of how changes will affect database performance prior to implementation.

Quest SQL Optimizer Suite for Sybase ASE

Quest SQL Optimizer for Sybase ASE allows developers to maximize the performance of database code via powerful data querying and automated SQL optimization.

Spotlight

Spotlight is a powerful operational monitoring and diagnostic tool that isolates database performance problems in real time and displays all database activity in an intuitive interface. Spotlight ensures faster problem resolution without the need for customized scripts or cumbersome utilities. It is available for Oracle, SQL Server, DB2 and Sybase environments.

High Availability

Shareplex for Oracle

SharePlex for Oracle is the leading low impact, real-time database replication solution that supports high availability, reporting, data movement and application integration on Oracle databases.

Development and Administration

Benchmark Factory for Databases

Benchmark Factory for Databases is a multi-platform database performance and code scalability testing tool that simulates users and transactions on the database and replays production workload in non-production environments. Through industry-standard benchmark testing, this tool ensures the best possible performance from databases, applications and new hardware deployed to production.

Quest Code Tester for Oracle

Quest Code Tester for Oracle reduces the risk of bugs making their way to QA or production by providing practical and thorough code testing. This relieves developers of the burden of writing and maintaining thousands of lines of test code.

SQL Navigator for Oracle

SQL Navigator for Oracle helps PL/SQL developers deliver high-quality applications in less time by automating common development tasks through an easy-to-use graphical interface. It combines simple navigation, a smooth workflow, advanced drag-and-drop PL/SQL editing and performance optimization. It's a complete solution that significantly reduces development time and pain.

Toad

Toad is a powerful, low-overhead tool that makes database and application development faster and easier. It also simplifies and automates day-to-day database administration tasks. Toad is available for Oracle, SQL Server, DB2 LUW, DB2 z/OS and MySQL. It offers features to make developers, DBAs and business analysts more productive than ever before. Quest also offers a one-stop resource for education, expertise and collaboration at www.toadworld.com.

Toad for Data Analysts

Toad for Data Analysts is designed specifically for IT and business professionals who need to access, understand and report on their data from any data source in their organization. It eliminates manual tasks associated with data gathering, comparison and documentation. In addition, the tool enables users to quickly deliver the insight to make effective business decisions.

Toad Data Modeler

Toad Data Modeler is a multi-platform database design and modeling tool that supports the individual DBA and developer. Its customizable interface and powerful features enable users to design and reverse engineer databases as well as deliver documentation, while supporting best practices to ensure database efficiency and performance.

Backup and Recovery

LiteSpeed Engine for Oracle

LiteSpeed Engine for Oracle integrates seamlessly into your RMAN and export backup strategies to deliver 70 – 90% compression and significantly reduce backup times. This tool is tailored to the needs of the Oracle DBA and non-Windows environments.

LiteSpeed for SQL Server

LiteSpeed for SQL Server is a low-impact, high-performance compression technology that allows organizations to reduce storage requirements, reduce backup times and accelerate recovery time, while providing complete control over the backup and recovery process.

DATABASE MANAGEMENT (continued)

Space and Capacity Management

Capacity Manager for SQL Server

Capacity Manager for SQL Server enables DBAs to gain control of disk space, growth rates and database performance by providing a centralized view of the environment, and intelligent index maintenance, as well as advice and metrics for consolidation projects.

Space Manager with LiveReorg®

Space Manager with LiveReorg® enables efficient space management, reorganization and restructuring to optimize storage capacity and performance of Oracle databases.

VIRTUALIZATION MANAGEMENT

Desktop

vWorkspace

vWorkspace, a virtual desktop management suite, provides solutions for provisioning, deploying and managing a virtual desktop environment. It is flexible across VDI, terminal services, and physical blade PCs, and supports a wide range of hypervisors.

Server

vConverter

vConverter significantly reduces the time and effort spent converting servers to the VMware, Microsoft or Virtual Iron platforms. It enables fast, easy and reliable conversions without disrupting the source physical system during the conversion process.

vFoglight

vFoglight provides performance monitoring, capacity planning, and chargeback to help organizations mitigate the impact of resource sharing, optimize resource utilization, and recover infrastructure costs.

vRanger Pro

vRanger Pro is the market-leading backup, recovery and backup management solution for virtual environments. It offers plug-n-play modularity and a service-based architecture.

vReplicator

vReplicator supports disaster recovery strategies with affordable replication of virtual servers. Built for short and critical recovery time objectives, it replicates the entire virtual machine, including configuration settings, operating system patches, and the applications themselves.

Storage

Storage Horizon®

Quest® Storage Horizon® provides you with a unified view of current and projected storage. Using this insight, you can maximize the utilization of existing and future storage assets and reduce storage spending up to 40%.

vOptimizer Pro

vOptimizer Pro is the only available storage optimization solution that automatically finds and reclaims over-allocated VM storage and then realigns 64K partitions to optimize VM performance.

WINDOWS MANAGEMENT

Manage Active Directory

Migration

Collaboration Services

Collaboration Services displays calendar details, free/busy information and global address lists in existing Outlook clients. It also provides secure synchronization with administrative control.

Domain Migration Wizard

Domain Migration Wizard enables migration to Active Directory, consolidation of Windows NT domains and splitting of Windows NT domains.

Migration Manager for Active Directory

Migration Manager for Active Directory simplifies Active-Directory-to-Active Directory migration and supports Active Directory re-design.

NDS Migrator

NDS Migrator migrates users from Novell NDS and Bindery environments to Active Directory and Windows Server 2000/2003/2008.

Availability

Recovery Manager for Active Directory

Recovery Manager for Active Directory provides granular recovery from inadvertent deletions or modifications to Active Directory data in minutes, instead of hours.

WINDOWS MANAGEMENT, Manage Active Directory – Availability (continued)

Recovery Manager for Active Directory *FOREST EDITION*

This solution simplifies the requirements for recovering the entire forest in the event of forest-wide corruption.

Spotlight on Active Directory Pack

Spotlight on Active Directory Pack provides real-time diagnosis, troubleshooting and resolution of all problems related to Active Directory replication, performance and availability.

Audit and Reporting

Active Administrator

Active Administrator lets administrators view, audit and report on the ever-changing state of their Active Directory infrastructure, as well as quickly recover problem objects; it also provides Group Policy management.

ChangeAuditor for Active Directory

ChangeAuditor for Active Directory proactively tracks, audits, reports and provides alerts on vital configuration changes—in real time and without the overhead of native auditing—to determine who made what change when, where and why.

ChangeAuditor for Exchange

ChangeAuditor for Exchange proactively audits the activities taking place in the Exchange environment and provides real-time, in-depth tracking. It also delivers detailed alerts about vital changes that occur to non-owner and owner mailboxes, administrative groups, mailbox policies, public and private information stores, organizational changes, distribution list changes, and more.

ChangeAuditor for File Systems

ChangeAuditor for File Systems drives the security and control of file systems by tracking all key file and folder changes in real time. It provides details on previous and new change values, as well as comments on why a particular change was made.

InTrust®

InTrust collects, stores, reports and provides alerts on event data from heterogeneous systems, as well as controls changes to Exchange, AD and GPOs.

InTrust Plug-in for Active Directory

InTrust Plug-in for Active Directory audits, reports and provides alerts on all domain controller activity, as well as details all changes to Active Directory and Group Policy.

InTrust Plug-in for Exchange

The InTrust Plug-in for Exchange provides real-time, detailed tracking of all user activity and non-owner access, and audits of configuration changes and permissions to Exchange mailboxes and servers.

InTrust Plug-in for File Access

The InTrust Plug-in for File Access provides real-time, detailed tracking of all user and administrator activity relating to file and object access.

Extending Reach Across Platforms

Authentication Services

Authentication Services allows Unix, Linux and Mac systems to use the access, authentication and authorization tool already in place for Windows resources (Active Directory)—extending AD's capabilities, including Group Policy for Unix/Linux.

Single Sign-on for Java

Single Sign-on for Java provides a unified platform for identity management of Java applications and services from the same Active Directory infrastructure used to provide single sign-on for Windows resources.

Raising Efficiency

Access Manager

Access Manager provides a single console for IT administrators to identify and control user and group access to resources such as files, folders and file shares throughout the enterprise.

ActiveRoles™ AD LDS/ADAM

ActiveRoles™ Server is the only comprehensive management solution for AD, AD LDS, or both applications at the same time. It can be used to centralize Active Directory and/or AD LDS management, creating a single point of administration and change control across the enterprise for all Microsoft directory services.

ActiveRoles™ Exchange Resource Forest Manager

ActiveRoles™ Exchange Resource Forest Manager synchronizes the provisioning and security settings between a user account Forest and the Exchange resource forest. It also provides a single interface for user account management.

ActiveRoles™ Quick Connect

ActiveRoles™ Quick Connect enables ActiveRoles Server to automatically provision and deprovision from an authoritative data source, such as an HR or ERP system, thereby automatically controlling user access. It extends ActiveRoles Server into the provisioning process on non-Active Directory connected systems for end-to-end identity and access synchronization.

WINDOWS MANAGEMENT, Manage Active Directory – Raising Efficiency (continued)

ActiveRoles™ Self-Service Manager

ActiveRoles™ Self-Service Manager enables administrators to empower application and data owners to securely manage their own resource access groups, while ensuring compliance.

ActiveRoles™ Server

ActiveRoles™ Server automates the provisioning, reprovisioning and deprovisioning process for users and groups in AD and beyond. It provides strictly enforced, role-based security, automated group management, change approval and easy-to-use web interfaces for self service.

GPOADmin

GPOADmin offers efficient deployment and management of group policy objects (GPOs) for better infrastructure security and control.

Quest One Identity Solution – Manage Identities and Access

Authenticate

Defender

Defender is a standards-based, two-factor authentication solution that supports token types from multiple vendors. It offers a cost-effective alternative to more expensive, proprietary and support-intensive solutions.

Enterprise Single Sign-On (ESSO)

Enterprise Single Sign-On uses the power of Active Directory for universal single sign-on while strengthening security, improving end-user and IT efficiency, and satisfying compliance demands.

Also: See descriptions for Quest Authentication Services and Quest Single Sign-on for Java on the previous page.

Authorize

GPOADmin

GPOADmin offers efficient deployment and management of group policy for better infrastructure security and control.

Group Policy Extensions for Desktops

Group Policy Extensions for Desktops allows administrators and security officers to enforce desktop end-point security through Group Policy.

Password Manager

Password Manager enables end users to reset forgotten passwords securely using stronger password policies, while reducing the help desk load.

Privilege Manager for Unix

Privilege Manager for Unix is a policy-based access control system that restricts authorization of the root password to administrators for common tasks.

Webthority

Webthority enables authentication and authorization based on the roles and rules of Active Directory (or any existing directories), while providing centralized management of all remote access accounts and activities.

Administer

ActiveRoles™ Server

ActiveRoles™ Server offers a practical approach to automated AD and AD LDS (formerly ADAM) user provisioning, as well as strict role-based administration and administrative policy enforcement for maximum security and efficiency.

Comply

ChangeAuditor for Active Directory

ChangeAuditor for Active Directory proactively tracks, audits, reports, and provides alerts on vital configuration changes—in real time and without the overhead of native auditing—to determine who made what change when, where and why.

ChangeAuditor for Exchange

ChangeAuditor for Exchange audits the activities taking place in the Exchange environment and provides real-time, in-depth tracking. It also delivers detailed alerts about vital changes that occur to non-owner and owner mailboxes, administrative groups, mailbox policies, public and private information stores, organizational changes, distribution list changes, and more.

ChangeAuditor for File Systems

ChangeAuditor for File Systems drives the security and control of file systems by tracking all key file and folder changes in real time. It provides details on previous and current change values, as well as comments on why a particular change was made.

Desktop Authority

Desktop Authority enables administrators to proactively manage, inventory, secure and support desktop PCs from a central location, providing complete management throughout their lifecycle. This reduces the total cost of desktop and application ownership.

WINDOWS MANAGEMENT, Quest One Identity Solution - Manage Identities and Access, Comply (continued)

InTrust

InTrust collects, stores, reports and provides alerts on event data from heterogeneous systems, as well as controls changes to Exchange, AD and GPOs.

InTrust Plug-in for Active Directory

InTrust Plug-in for Active Directory audits, reports and provides alerts on all domain controller activity, as well as details changes to Active Directory and Group Policy.

InTrust Plug-in for Exchange

The InTrust Plug-in for Exchange provides real-time, detailed tracking of all user activity and non-owner access, and audits configuration changes and permissions to Exchange mailboxes and servers.

InTrust Plug-in for File Access

The InTrust Plug-in for File Access provides real-time, detailed tracking of all user and administrator activity relating to file/object access.

Reporter

Reporter collects, compares, reports on and resolves Active Directory and Windows-based configurations for change auditing, Windows security assessments, or AD pre- and post-migration analyses.

Archive Manager

Archive Manager provides a platform for Microsoft-centric archiving to reduce storage costs, enable fast e-discovery and protect critical messaging data for strict compliance.

Collaboration Services

Collaboration Services enables secure synchronization of free or busy information as well as global address lists between organizations.

Exchange Migration Wizard

Exchange Migration Wizard migrates environments directly to Exchange 2003/2007 with true coexistence through synchronization and ZeroIMPACT on end users.

InTrust® Plug-in for Exchange

The InTrust Plug-in for Exchange provides real-time, detailed tracking of all user activity, non-owner access. It also audits configuration changes and permissions to Exchange mailboxes and servers.

MessageStats™

MessageStats gathers, analyzes and reports on Exchange and other messaging components, enabling executives and administrators to align e-mail usage with service levels, migrations, capacity planning, compliance and strategic goals.

Migration Manager for Exchange

Migration Manager for Exchange is the comprehensive solution for seamless migrations from Exchange 2000/2003.

Migration Suite for Exchange

Migration Suite for Exchange is a ZeroIMPACT solution for planning and executing migrations to Exchange 2007/2003 from Exchange 5.5/2000/2003.

Policy Authority for Unified Communications

Policy Authority for Unified Communications protects organizations from external attacks, prevents intentional or inadvertent leaks of sensitive data, and enables IT to demonstrate compliance in real-time communications.

Recovery Manager for Exchange

Recovery Manager for Exchange rapidly discovers and recovers business-critical Exchange data to aid with electronic investigations.

Spotlight on Messaging

Spotlight on Messaging provides real-time diagnostics, troubleshooting and problem resolution for Exchange, Office Communications Server and Blackberry.

File Migrator for SharePoint

File Migrator for SharePoint migrates file share and NDS content to SharePoint 2007.

Migration Manager for SharePoint

Migration Manager for SharePoint migrates sites, document libraries and lists from SharePoint 2003 to SharePoint 2007.

Public Folder Migrator for SharePoint

Public Folder Migrator for SharePoint facilitates bulk migrations of Exchange Public Folder content to SharePoint.

Recovery Manager for SharePoint

Recovery Manager for SharePoint provides granular recovery of anything in the backup of a SharePoint content database, including individual documents, lists, document libraries, sites and workspaces. It also provides a convenient way to search, locate and preview any item from across multiple database backups before restoring it.

WINDOWS MANAGEMENT, Manage and Develop SharePoint (continued)

Site Administrator for SharePoint

Site Administrator for SharePoint provides discovery, site and content browsing, data collection, reporting, and management of policy and permissions of the entire SharePoint environment.

Web Parts for SharePoint

Web Parts for SharePoint enables the rapid development of custom applications using data from anywhere in the enterprise. The ability to build applications, menus and dashboards through configuration, rather than code, reduces the cost and time to build applications by up to 80 percent.

Migrate from Lotus Notes

Coexistence Manager for Notes

Coexistence Manager for Notes complements Notes Migrator for Exchange to ensure a seamless migration from Notes to Exchange, providing high-fidelity e-mail, calendaring, and document hyperlink coexistence.

GroupWise Migrator for Exchange

GroupWise Migrator for Exchange enables organizations to migrate from GroupWise to Exchange and Exchange Online while preserving important organizational information and minimizing impact to users.

Migrator for Sametime

Migrator for Sametime simplifies migration from Sametime to Microsoft Office Communication Server by providing a detailed pre-migration assessment, centralized project management, and automation of tasks.

Notes Migrator for Exchange

Notes Migrator for Exchange enables you to migrate directly from Lotus Notes to Exchange with robust project management and reporting tools, and minimal impact to users—even to “the cloud.”

Notes Migrator for SharePoint

Notes Migrator for SharePoint analyzes and migrates Notes, QuickPlace and Domino.Doc application content to SharePoint—even to “the cloud.”

Extend the Power of System Center

Monitor and Diagnose

Quest Management Connectors - Operations Manager 2007 Edition
Quest Management Connectors unify the System Center Operations Manager 2007 platform with more than 15 non-Microsoft management platforms for monitoring and proactive issue resolution.

Quest Management Xtensions - Operations Manager 2007 Edition
With this tool, organizations with heterogeneous environments can now use the comprehensive monitoring and alerting capabilities of Operations Manager to manage the entire IT infrastructure.

Quest Management Pack for AS400 - Operations Manager 2007
This tool extends the Windows management capabilities of System Center Operations Manager 2007 to IBM AS400/iSeries mainframes for monitoring and proactive issue resolution.

Quest Management Pack for Cisco - Operations Manager 2007 Edition
This tool extends the Windows management capabilities of System Center Operations Manager 2007 to Cisco devices for monitoring and proactive issue resolution.

Quest Management Pack for .NET
Quest Management Pack for .NET extends MOM 2005 and Microsoft Systems Center Operations Manager 2007 to monitor .NET applications and collect root-cause diagnostic information in real time.

Quest Management Pack for Oracle
The Quest Management Pack for Oracle provides the System Center Operations Manager user or administrator with vital-signs monitoring support for Oracle 9i and 10g databases deployed on managed resources.

Quest Management Pack for z/OS - Operations Manager 2007 Edition
This tool extends the Windows management capabilities of System Center Operations Manager 2007 to IBM z/OS/MVS/zSeries mainframes for monitoring and proactive issue resolution.

Manage Change and Configuration

Quest Management Xtensions - Configuration Manager 2007 Edition
This tool enables organizations with cross-platform environments to extend the management capabilities of Configuration Manager to non-Windows systems, including Unix, Linux, Mac OS X and VMware ESX Server.

WINDOWS MANAGEMENT, Extend the Power of System Center - Manage Change and Configuration (continued)

Quest Management Xtensions for Device Management
With Quest Management Xtensions for Device Management, organizations with complex IT environments can natively extend the capabilities of Configuration Manager from the Windows domain to more than 115 non-Windows systems and devices, including Unix, Linux, Mac OS X, AS400, network devices, storage devices and more.

Quest Management Xtensions for SMS 2003

Quest Management Xtensions for SMS 2003 enables organizations with complex, heterogeneous environments to extend the Windows management capabilities of SMS 2003 to non-Windows systems such as Unix, Linux, Mac OS X and VMware ESX Server.

Manage Windows Data

Storage Consolidator for Windows

Storage Consolidator for Windows automates the online migration of file server data with security settings intact as a part of a server consolidation project.

Storage Manager for Windows

Storage Manager for Windows enables storage administrators to perform intelligent assessment and automate crucial, ongoing management tasks for an optimized Windows storage network.

About Quest Software, Inc.

Now more than ever, organizations need to work smart and improve efficiency. Quest Software creates and supports smart systems management products—helping our customers solve everyday IT challenges faster and easier. Visit www.quest.com for more information.
